MANUALLY DEPLOYED BOLLARDS

MINUTEMAN M30™

Crash protection with the push of a finger!

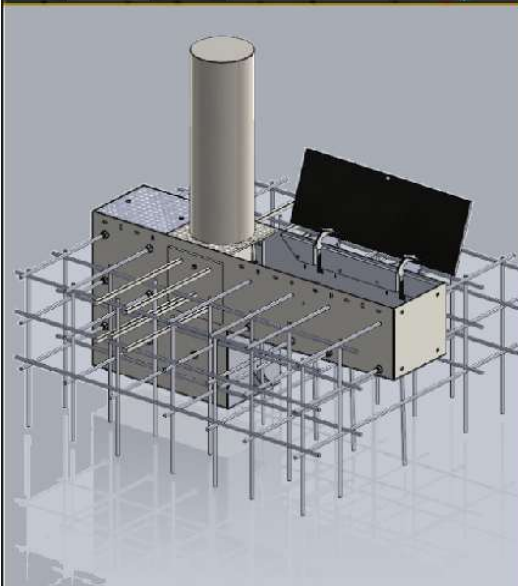

The MinuteMan bollard system is a patented in-ground vehicular barrier, precisely counter balanced and fully deployable in less than a minute with the push of a finger.

Each bollard weighs over 350 LBS and can be moved into the up or down position within seconds without the assistance of forklifts or other machinery. This surface flush, rebar reinforced, hot dip galvanized, barrier system is 100% manually deployable - No tripping hazards, no holes to cover, no power or controls required.

The MinuteMan 1100MRB is modular - install as many units as needed to cover any size roadway. M30 Crash Engineered.

... Because Safety Never Waits !

\$12,500.00 MSRP
